

Seabury Winter Sowing

Improving Biodiversity

**Truly wild hillsides
intended for
wildlife and
pollinators ... and
ease of care**

Invasives Invade!

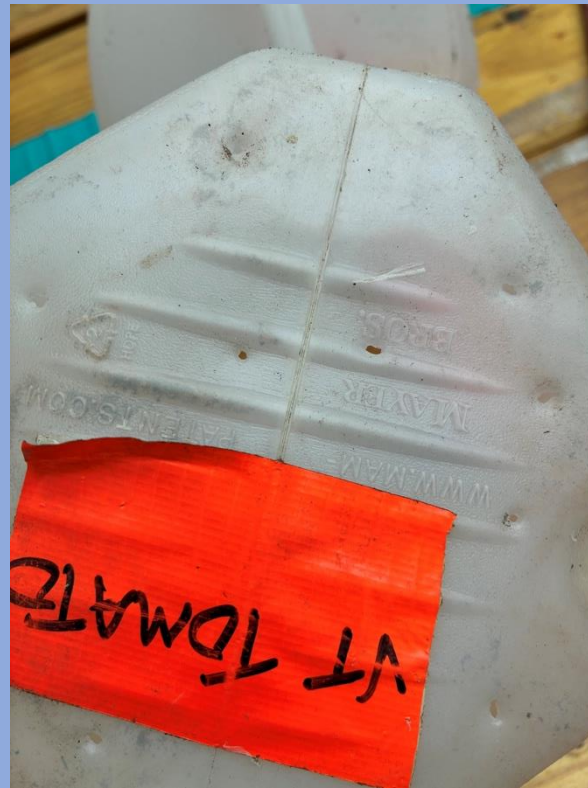

The lone tended wild hillside

**1. Drill seepage holes in
bottom & lower sides
3. Slice around jug at
bottom of handle,
leaving at least 1"
connected**

Early February:

4. Recruit your crew of 10-15 people and plan your workshop

5. Purchase or gather

- top quality potting soil (50 jugs=2 2 cu ft bags)**
- Duct tape**
- Labels for inside jugs (we use plastic knives)**
- Permanent markers/paint pens**

Late February

In a space with water and easily cleaned floor:

- **Jugs**
- **Potting soil**
- **Seeds**
- **Tape and labels**
- **Permanent markers/paint pens**
- **Your team of 10-15**

Day of Workshop:

Leader One:

- Puts soil in bin and waters at least one hour ahead
- Distributes seeds to tables for separating from chaff and stems
- Sets up duct tape table (cut a strip the exact length needed as sample)
- Ensures enough tables for each planter to have their own

Leader Two:

- Makes labels to match seeds available (guesstimate): bottom duct tape labels and interior standing labels
- Delivers labels to seed distribution point so they go with seeds to Task Team 1
- Ensures inventory is on table for Team 6
- Oversees delivery system at end

Task Team 1:

- Don't breathe!
- Separate seeds from chaff/stems
- Ensure properly labeled in seed containers

Task Team 2:

- **Cuts duct tape at length you've laid out**
- **Hangs from table for pick up by Task Team 4**

- Fill jugs with 3.5 – 4" of MOIST potting soil
- Leave caps on jugs
- Deliver to Team 4

- Fill jugs with 3.5 – 4” of MOIST potting soil
- Leave caps on jugs
- Deliver to Team 4

Task Team 4:

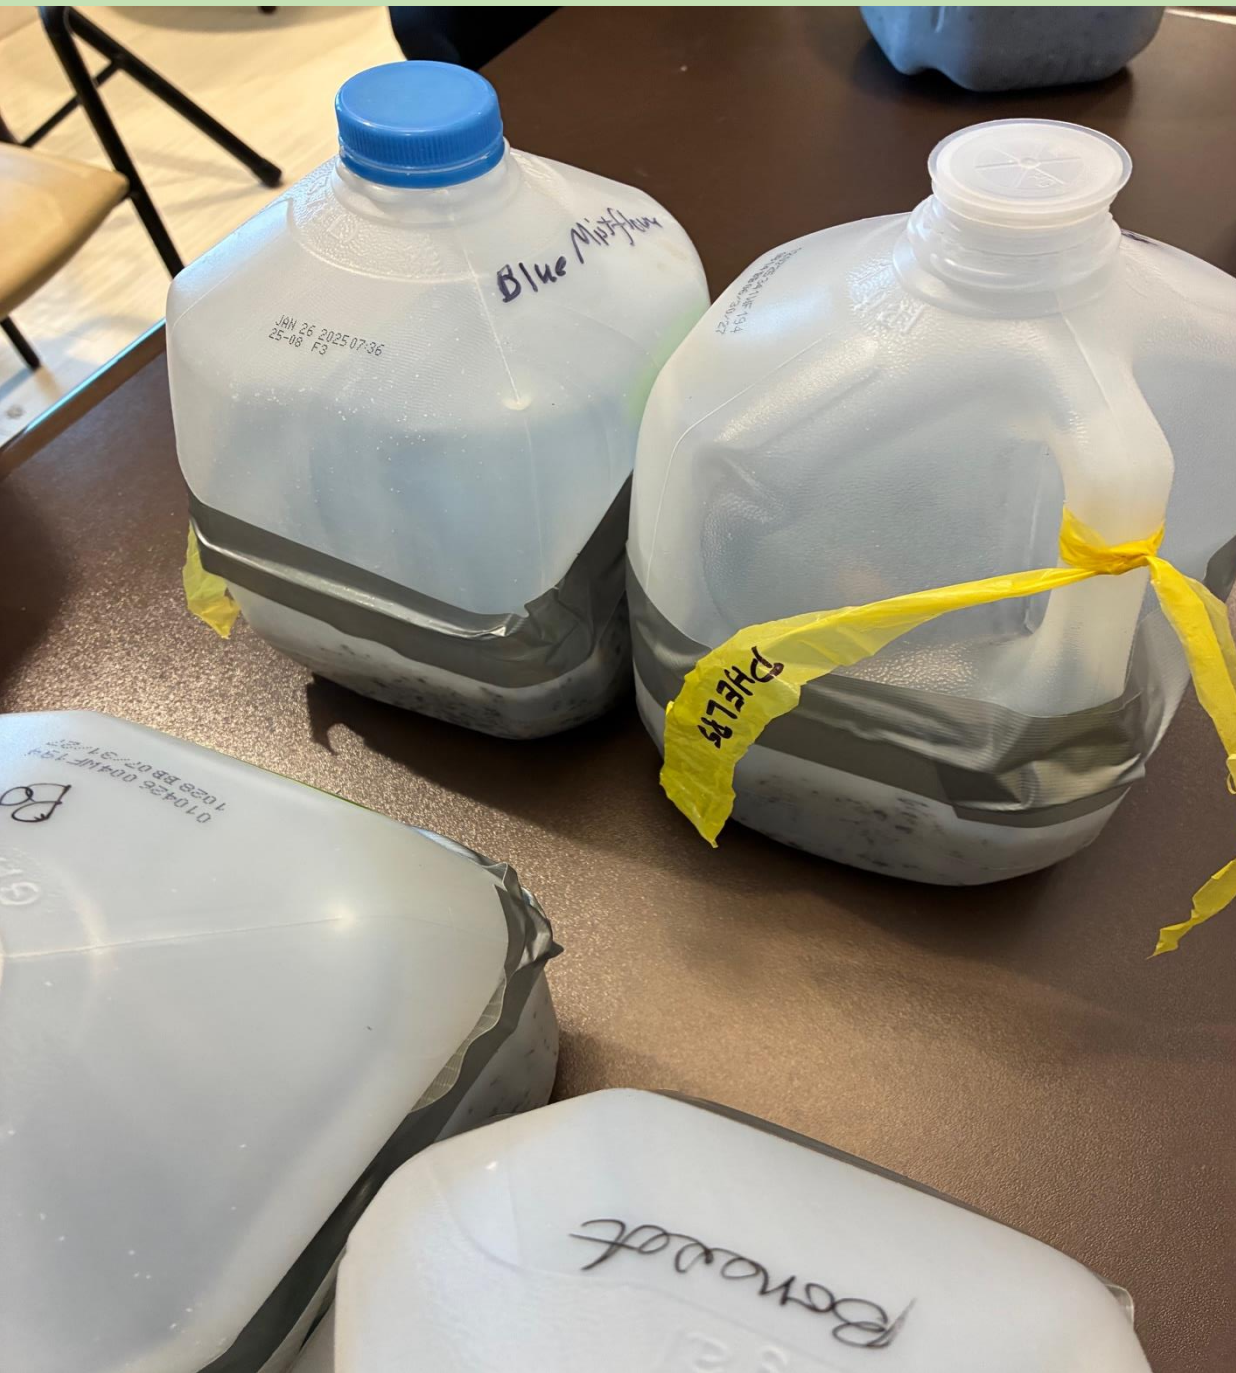

- Each has their own table
- Receive jugs and seeds
- Put duct tape seed label on bottom
- Scatter seeds evenly on top of soil and press lightly
- Add about 1/8" of moist soil on top
- Insert interior label stick
- Add written label to top of jug
- Deliver each to Team 5 for sealing

Task Team 5:

- **Verify all labels in place**
- **Carefully apply duct tape around slit, ensuring full seal**
- **Take to Task Team 6**

Task Team 6:

- **Receive sealed jugs**
- **Assign to “adopter” who will tend the jug for next 3+ months**
- **Label jug with adopter’s name**
- **Enter on inventory seed type and adopter for each jug**
- **Oversee delivery to adopters
(don’t carry by handle!)**

**Three months
later!**
